

Highfields House, Caledon

Location: Caledon

Acreage: 34 Acres

Price: \$1,950,000.00

Highfields House, Caledon

The legendary Highfields property located on the ridge above Caledon East spans over 34 acres. Scenic beauty, historic gardens, commanding views, crystal water, deep valleys. The home is sited on one of the largest contiguous blocks of pristine Caledon countryside available.

MAIN HOUSE

Down the long winding drive is the main house with countryside views. The main house was designed for extended family use with a kitchen and entertaining spaces in each wing. The main house overlooks the grand gardens and down the valley over the cascading lower ponds. On clear days one can view the city skyline in the distance. The home was designed by noted Canadian architect William Fleury who is considered one of the leaders in Canadian modern architecture.

North Wing

The west façade of the home was created from fieldstone and the design follows the contour of the land down the hillside to the gardens and ponds.
